SUMMARY

Full-stack web developer leveraging hospitality management background to build a more intuitive user experience on the web. Recently earned a certificate in full stack development from Georgia Tech Coding Bootcamp, with newly developed skills in JavaScript, CSS, React.js, Node.js and responsive web design. With each project, the aim is to become better at developing more skills. Have worked on a team of three to develop a search/locator app that helps locals and travelers find destination breweries. Very excited to leverage my skills as part of a fast-paced, quality-driven team to build better experiences on the web.

TECHNICAL SKILLS

Languages: HTML5, CSS, Javascript, Node.js, express, MySQL

Applications: bootstrap, bulma, jquery

PROJECTS
